

SOJU SAJI

MERN STACK DEVELOPER

+91 8590457510 | sojusaji.21@gmail.com | sojusaji.github.io/portfolio | github.com/Sojusaji

PROFESSIONAL SUMMARY

Highly motivated and tech-driven MERN Stack Developer with a degree in Computer Science and hands-on experience building full-stack web architectures. Proficient in crafting responsive frontend user interfaces using React.js and designing secure, scalable backend APIs with Node.js, Express.js, and MongoDB. Adept at digital problem-solving, processing complex database aggregations, and implementing secure token authentication workflows to deliver clean, standard, and modern web solutions.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), HTML5, CSS3, Java
Frontend Frameworks:	React.js, Vite, Tailwind CSS, Bootstrap
Backend & Database:	Node.js, Express.js, MongoDB (Mongoose ODM), REST APIs
Tools & DevOps:	Git, GitHub, EmailJS API, Razorpay SDK, Nodemailer, Octokit API
Mobile Development:	Flutter

PROJECTS

PROFESSIONAL PORTFOLIO WEBSITE

[Live App] [Source Code]

- Designed and deployed a highly responsive, lightning-fast personal portfolio website utilizing React.js built with Vite.
- Integrated a serverless communication layer via the EmailJS API, enabling reliable client-side message delivery directly from the browser to a personal inbox without an independent backend server.
- Implemented modular component strategies with custom Vanilla CSS to maximize layout responsiveness across mobile, tablet, and widescreen desktop displays.

EMBROIDERY & JEWELLERY PLATFORM — Frontend Client *(In Development)*

[Source Code]

- Architecting an interactive single-page e-commerce storefront utilizing React.js and Tailwind CSS engineered for a dual retail marketplace (custom stitching portfolios and rolled gold ornament storefronts).
- Integrating a secure online credit checkout sequence by embedding Razorpay payment handles alongside a fallback layout to process offline manual store orders.
- Designing an administrative analytics panel with custom data graphs to track live revenue data, geographical distribution models, and multi-tier customer rankings.
- Developing a digital client measurement suite to catch structural anatomical details and serve dynamic material mockup previews directly inside the user cart interface.

EMBROIDERY & JEWELLERY PLATFORM — Backend API Server *(In Development)*

[Source Code]

- Building a secure Node.js and Express.js REST API server configured with JSON Web Tokens (JWT) for robust session workflows and Role-Based Access Controls (RBAC) separating administrative from standard clients.
- Configuring complex MongoDB Aggregation Pipelines to parse large sets of purchase data and deliver real-time metrics back to the admin control panel dashboard.
- Structuring a automated system maintenance script integrating the GitHub Octokit API to host inventory images dynamically via a secondary code branch instead of crowding server file space.

- Integrating automated Nodemailer routines to secure account registration steps using real-time dispatch of One-Time Passwords (OTPs) and validation URLs.

APPLICATION & DEVELOPMENT EXPERIENCE

Full-Stack Web Developer (Independent / Project-Based)2022 – Present | Kerala, India

- Acquired deep technical expertise across modern JavaScript environments, engineering complex full-stack web architectures.
- Focused engineering efforts on structuring optimized database queries, responsive cross-browser compatibility, and modular codebase logic.
- Managed source code deployments and project iterations across Git version control systems to maintain safe structural history files.

EDUCATION

Bachelor of Science (B.Sc.) in Computer ScienceMahatma Gandhi UniversityGraduated: May 2022

Higher Secondary Education (12th Grade — Computer Science)Kerala Board of Public ExaminationsPassed: March 2019

LANGUAGES

English (Professional Working Proficiency) | Malayalam (Native / Bilingual Proficiency)
